PROFILE STATEMENT

Dynamic and results-oriented AI Developer with expertise in Machine Learning, Generative AI, and scalable Web Applications. Passionate about building intelligent systems using Python, React, and modern AI frameworks to solve real-world problems through automation and innovation.

EXPERIENCE

Zetpeak

AI/ML Intern

Bengaluru, Karnataka

- Built and optimized ML models using Python, Scikit-learn, and TensorFlow for real-world applications.
- Developed AI-powered REST APIs using FastAPI and Flask integrated into web applications.
- Worked with LLMs and prompt engineering to design intelligent automation workflows.
- Collaborated with frontend teams to integrate AI modules into React applications.
- Improved model inference performance using efficient preprocessing and caching techniques.

TECHNICAL SKILLS

- **Languages:** Python
- **AI/ML:** TensorFlow, PyTorch, Scikit-learn, Keras, LLMs
- **Web:** React, FastAPI, Flask
- **Databases:** MySQL, MongoDB, SQLite
- **Tools:** Git, Docker, REST APIs, Web Scraping

EDUCATION

Garden City University

B.Tech in Artificial Intelligence and Machine Learning (CGPA: 7.0)

Bengaluru, Karnataka

PROJECTS

AI Interviewer Bot | Python, LLM, FastAPI

- Built a generative AI interview simulator that generates technical questions and evaluates responses.
- Integrated LLM APIs for automated question generation and answer analysis.

AI Code Reviewer | Python, LLM

- Developed an AI-powered tool to analyze GitHub repositories for code quality and security issues.
- Combined static analysis with LLM reasoning to detect vulnerabilities and bad practices.

Facial Recognition System | Python, OpenCV, ML

- Implemented real-time face detection and recognition using OpenCV and ML models.
- Enabled webcam-based live identification and tracking.

Deepfake Detection Using AI | Python, Deep Learning

- Built a deep learning model to detect manipulated media and deepfake content.
- Optimized preprocessing and evaluation pipelines for improved detection accuracy.

INTERESTS

- Generative AI, Vision-Language Models, and LLM Applications
- Open-source contribution and mentoring
- Building automation systems to reduce manual effort
